About Us

Building Expertise. Delivering Excellence.

BEMCO Aluminum & Glass, operating under Building Experts Co. for Metal Industries, is a Saudi Arabia-based company specializing in architectural aluminum and glass solutions. Established in January 2017, the company focuses on the design, engineering, fabrication and installation of aluminum and glazing systems for a wide range of construction projects.

With a commitment to quality workmanship, technical precision and professional project execution, BEMCO provides solutions that support the functional and architectural requirements of modern buildings. Its areas of expertise include curtain wall systems, aluminum windows and doors, structural glazing, aluminum cladding, frameless glass systems, skylights and related metal works.

Supported by manufacturing facilities, specialized machinery and technical capabilities, BEMCO works to transform project designs into practical building solutions. The company emphasizes coordination between engineering, fabrication and installation to help achieve the required quality, finish and project specifications.

BEMCO aims to build lasting relationships with clients, consultants, contractors and suppliers through dependable service, effective communication and a professional approach to every project.

Serving the evolving construction sector in Saudi Arabia, the company continues to develop its capabilities in architectural aluminum and glass systems, contributing to commercial, residential, hospitality and institutional developments.

2017 Year Established	**2,000+ m²** Reported Factory Area
45,000 m² Reported Annual Capacity	**Riyadh** Kingdom of Saudi Arabia

Our Mission

Turning Architectural Designs into Practical Solutions

Our mission is to deliver reliable aluminum and glass systems through professional engineering, precise fabrication and quality installation. We strive to understand the specific requirements of every project and coordinate our work in line with approved drawings, technical specifications and client expectations.

Through skilled workmanship, effective planning and collaboration between engineering, production and site teams, we aim to maintain consistent standards, meet project requirements and provide dependable service throughout the project lifecycle.

Our Vision

Shaping the Future of Architectural Aluminum & Glass

To strengthen BEMCO Aluminum & Glass as a trusted provider of architectural aluminum, glazing and facade solutions in Saudi Arabia. We aspire to contribute to modern construction through innovative system solutions, advanced manufacturing practices and a consistent focus on quality.

Our vision is to continuously develop our technical capabilities, enhance our production processes and build lasting relationships with clients, consultants and contractors. We aim to support evolving architectural requirements by delivering solutions that combine visual appeal, functionality and dependable performance.

Our Quality Policy

Quality Through Every Stage of Delivery

BEMCO Aluminum & Glass is committed to maintaining a quality-focused approach across its operations. We aim to ensure that materials, fabrication processes and installation activities are aligned with approved project specifications and applicable requirements.

Compliance & Standards

Following approved drawings, technical specifications and relevant project requirements.

Material Verification

Checking materials and system components against approved submittals and project needs.

Precision & Workmanship

Emphasizing accuracy in cutting, machining, assembly, finishing and installation.

Inspection & Improvement

Reviewing work at appropriate stages, addressing identified issues and improving processes.

Client Satisfaction

Maintaining professional communication and coordinating with clients and project stakeholders to support agreed expectations

Infrastructure & Factory

Built for Precision. Equipped for Performance.

BEMCO Aluminum & Glass operates manufacturing facilities equipped to support the fabrication of architectural aluminum systems. Our processes include profile cutting, machining, notching and assembly for windows, doors, curtain walls and related applications.

Through specialized machinery, technical coordination and skilled workmanship, we aim to maintain fabrication accuracy, consistent finishing and alignment with approved project specifications.

Manufacturing Capabilities

Aluminum Profile Processing: Precision cutting and machining of aluminum profiles.

Fabrication & Assembly: Notching, milling and assembly of architectural components.

Finishing & Quality: Attention to fit, finish and fabrication requirements.

Production Coordination: Coordination with technical drawings and installation schedules.

Message From The Ceo

At BEMCO Aluminum & Glass, we believe that every successful project begins with a commitment to quality, precision, and trust. Our goal is to deliver architectural aluminum and glass solutions that meet the evolving demands of modern construction while maintaining high standards of workmanship and professional service.

Since our establishment, we have focused on strengthening our technical capabilities, improving our fabrication processes, and building lasting relationships with our clients, consultants, contractors, and business partners.

We understand that every project comes with unique requirements and expectations. Through teamwork, technical expertise, and a quality-driven approach, we strive to turn architectural concepts into practical, reliable, and visually refined solutions.

As we continue to develop our capabilities, we remain committed to continuous improvement, responsible project execution, and client satisfaction. I would like to thank our valued clients, partners, and dedicated team for their continued trust and contribution to our journey.

BEMCO Aluminum & Glass

Organizational Structure

One Team. Multiple Expertise. Shared Goals.

Total Listed Manpower: 51

Machinery & Equipment

Precision Equipment. Quality Fabrication.

BEMCO Aluminum & Glass utilizes specialized machinery to support the processing and fabrication of architectural aluminum systems. Our equipment supports essential operations including profile cutting, CNC machining, notching, end milling and component preparation.

Combined with technical expertise and skilled workmanship, these capabilities support the production of aluminum components in line with project drawings and specifications.

INDUSTRIAL EQUIPMENT LIST

Machine Name	Description / Application	Qty
PROMASTER XL 7223M / CNC	High-Precision ACP CNC Router Machine	1
DG 244+ E555/5	Double-Head Precision Cutting Machine	1
ASK 134	Industrial Notching Machine	1
AF 223	End Milling Machine	2
SA 142/35	Automatic Profile Cutting Saw	1
TS 161/21	Single Head Table Saw	3
Vertical Saw	ACP Panel Cutting & Grooving Machine	1
Hydraulic Press	Multi-Purpose Hole Punching Press	1

Total Specialized Units: 11+ Heavy Industrial Machines
Annual Processing Capacity: 45,000+ m²
